

HEARING AID COMPATIBILITY (HAC) REPORT
THUMB CELLULAR, LLC
Updated: January 11, 2010

I. Explanation of Handset Level of Functionality

A. Determination of a handset's level of functionality was based on the cost of the unit, the features offered, and the operating capabilities of the unit. Thumb Cellular has identified the following four (4) levels of handset functionality:

1. Lower-Tier – includes handsets with a retail value of \$129 or less that have basic features, but do not offer a camera and may only have limited data functions.
2. Mid-Tier – includes handsets with a retail value of \$139 up to \$219 that include all the basic features and, in addition, offer a camera and bluetooth technology. All models in this category offer a full range of data functions. Some models may also offer an expansion memory slot and music player capabilities.
3. Higher-Tier – includes handsets with a retail value of \$239 up to \$399 that include all the basic features, offer a camera and bluetooth technology, and an expansion memory slot and music player capabilities. All models in this category offer a full range of data functions. In addition, some models may also offer a few on-screen, quick-access keys.
4. Smart Phones – includes handsets with a retail value greater than \$400 that include all the functions offered in the previous three (3) categories and also have the functionality of a PDA.

II. Required Reporting Information Common to All Handsets Offered

- A. Thumb Cellular's website is www.thumbcellular.com; it has detailed information about all handsets offered, about HAC, and what HAC rating each handset has.
- B. The dates of retail availability for each handset are listed below. Thumb Cellular can only offer handsets that manufacturers make available in a generic version for the smaller, regional carriers.
- C. All handsets offered by Thumb Cellular work on our CDMA network and will work on either the 850 or 1900 frequencies.
- D. All handsets offered by Thumb Cellular are offered at all four (4) stores.
- E. All 14 handsets offered by Thumb Cellular are HAC compliant as of the time of this report.
- F. Thumb Cellular is not offering any handsets that are not compliant at this time.
